

## ***Petunia x hybrida*** **SUCCESS!® Twilight Mix**

### ***Culture guide***

**Uses:**

Pots, Hanging Baskets, Mixed Containers and Landscape

**Exposure:**

Sun

**Garden height:**

12" / 30 cm

**Sowing method:**

1 pellet per plug

**Media:**

Sowing media: pH 5.5-5.8; keeping the pH below 6.0 will help to keep boron and iron available; EC 1.0

Growing on: pH 5.5-5.8; EC 1.5-2.0

**Fertilization:**

Plug culture: Maintain an EC

Growing on: Fertilization: Feed at 100-200 ppm nitrogen. Under high light conditions, apply an ammonium-based feed (17-5-17). To prevent stretching under low light conditions apply a calcium-based feed (14-4-14). Under high light and long days an ammonium-based feed (20-10-20) is preferred.
